

Tag Line Kit

Tag Line Location: Attach tag line 6" to 8" below last rigger eye.

Outrigger Clip: Must be up when using tag line. Once the bait is in position, put your rod in the rod holder. Put a rubber band in the tag line clips, take line in hand and wrap the rubber band around it 8 or 9 times. Put loose end of rubber band in tag line clips. Free spool reel until tag line return goes up as far as possible. Allow 15 to 20 degrees bow in your line from rod tip to rubber band.

Tag Line Return Weight: Weight moves up when letting line out and will fall after strike.
